There was an improvement in the to of the Stock Market this morning. Lo don bought the Americans, and Londo. lead was followed on this side by rat heavy covering of shorts, with some co mission buying. The actual meeting the Convention perhaps influenced bears to cover, although the prospect the Convention had not. In addition this, there was a slightly better feeling regarding the wheat situation and one two of the steel mills were reopened business. There is no particular rea for expecting a strong market as yet, a rally today and tomorrow seemed unlikely at 12 o'clock. Professionalism still the dominant factor in the mark and while this may be said it is useld to expect any extended revival, no matt how much intrinsic conditions warrant earnings statements of the day w

St. Paul's gross earnings for the seco week of June were \$776.535, an increase \$45,000. St. Paul yesterday sold at a low figure than even the lowest of the D cember break. It recovered this mornic on more hopeful talk of the spring whe crop. It should be remembered with gard to this ystem that, while it is granger system, its haul of spring wh-is only a small part of its total freig business—not more than 12 per cent,

There has been much printed regarding the wheat situation that is untrue, many deductions drawn that are w without foundation. Prime, the wheat e pert, states it as his opinion that while the crop is undoubtedly damaged, the reports have been much exaggerated. He also points out the fact that the farmers throughout the Northwest are prosperous and in funds. He says that a brisk autumn trade in the West is well nigh assured it may be added to this that the sured. It may be added to this that the farmers will get high prices for their wheat that will almost make up, if not quite, for all the shortage in the crop.

clific increased for the second week of June \$82,600.

President Gery has issued a statement on his return from his annual inspection on his return from his annual inspection tour of the Federal Steel properties. He is not in a pessimistic mood, but rather the contrary, though he acknowledges that business is not as good as it was some months ago. His concern is turning out about 75 per cent of its capacity of products. The mines are running full time. The export trade is large and increasing. It may be added to this that nine of the Redeal Steel wills true of the Idia short Federal Steel mills, two of the Joliet plant of the Illinois Steel Company, have re-sued. The steel and iron securities were somewhat better this morning.

The gross earnings of the Northern Pacific for the fiscal year ending June 30, partly estimated, are \$29,931,285. The net earnings for the year, partly estimated, are \$15,700,000. The increase in the gross earnings will be about \$3,930,000, and the increase in net nearly \$2,00,000. It will be seen that there is the best of cause for bullishness regarding this stock, with all the conservatism of the directors in not in-creasing the dividend. There was a rumor in the street yesterday that the directors in the course of the next two months if the spring wheat crop is a good one. This story seems not unlikely, but it has not the benefit of official sanction. In any event, however, a company with such a record as the above is prosperous in the extreme, and its securities should not go bagging at their present prices. The com-

mon stock was stronger today.

was slightly higher than the local final on manipulation by insiders who wish to buy the stock at a low price.

Pacific Mail seems to be supported around its present level. It has declined none during the past few days of weakness in the general market. There is good reason for buying the stock at its present price, which does not represent the actual value of the ships and other property of the company. Mr. Huntington is quoted as saying that the business ton is quoted as saying that the business of the company is good and satisfactory to him. If there is to be war in China it will probably be much better during the coming months.

Sugar holds its own with great persistence. It declined yesterday to 1141-4 and closed at 1147-8, showing only a small net loss for the day. Today it got above 115 and held well.

BOSTON, June 19.—Burns Pierce won the twenty-mile motor paced professional match race with Michael yesterday afteron at Charles River Park. This event was the star feature of the card and proved an exciting one, although most of the fans had figured out the little Welshman

At the start both men had difficulty in catching the pace and Michael had to take the tail end of the procession, which he held until toward the end of the fifth mile, when he was up like a flash and passed Pierce. They maintained the same relative position for another five miles, when Pierce struggled up again and retained the lead almost continuously to the end of the race, finishing with a good margin to spare. margin to spare.

How the Trust Compromised Differences With Its Employes.
PITTSBURG, June 19.—The speedy settlement of the wage scale of the window glass blowers and gatherers was explained today when it was announced that the American Glass Company, the Window Glass Trust, had agreed to give the American Window Glass Workers' Association 5,000 shares of common stock on condition

that the co-operative factories shall act in unison with the trust.

There are 2,200 window workers in the country and this arrangement will leave only 200 blowers for the independent factories. Some of the latter, it is predicted, will practically have to quit business partial. will practically have to guit business until some more blowers come over from Eu-
